Lotta delusional folks trying to sell for more than worth everywhere you look.

I am not even sure I want to buy one yet, but the ones advertised here are so insanely overpriced, I cannot in good faith even look or consider in any way.

The Texas Comptrollers Texas Presumptive Value calculator is very reliable and is adopted as PROOF of the Value for tax purposes.

Lawyers drove the price of Cars up to the insane values of today, \$30k to \$70k. with all kinds of safety issues including exploding gas tanks. But Who can blame lawyers and the courts for the insane overpricing in USED 10+ year old cycling today?

NOBODY, We must blame the insane jerks that want to drive up the cost of living for all of us.

They are too driven and too wealthy. MONOPOLY? The total destruction of good people and good times is their only financial driven motivation and interest. Seeing and or watching, older high mileage, undesirable, wore out, poorly maintained or high maintenance, overpriced motorcycles on craigslist that never sell for years on end has become a regular thing. Seals wear out, age and sitting can destroy a motorcycle.

hahahahaha.....DELUSIONS of nuts, with overpriced motorcycles, are still DELUSIONS

Lotta crazy in this world. Now it includes nutters with Valkyries and FJR's for sale too. GOOGLE shows numerous discussions all over the United States regarding overpricing and the NUTS that drive it. LOL...They are BUSTED!
